OLIVIA'S OLIPHANT SCIENCE PROJECT COVER PAGE

Software - power point and book creator. Mummy filmed me on the iphone. My video was uploaded to youtube

Bibliography - my mum knows about covid. I intervued her and read information from the sa health website and proffeser nicola

Problems: I was using pictures from google for my covid slides but my Mum said we weren't allowed to so I drew my own pictures on book creator instead. Also there was a shadow in the background with the projector so we used the television. And when we first started this we were free but just when we were about to finish we went into lockdown so I had to change this to make sure I was teaching people the right thing.

My Mum helped me to use the computer and understand everything and my dad and godfather helped me adjust the projector so it would be just right
