“Candy Chemistry” By Abigail Atkinson

My video can be found at <https://www.youtube.com/watch?v=-xwq168fK9M>

It was filmed using an Apple iPhone. The software used to create the video was InShot and Movavi Suite 20.

1. Bibliography

[Gorgeous and Delicious Candy Geode Kitchen Science For Kids \(steampoweredfamily.com\)](https://www.youtube.com/watch?v=-xwq168fK9M)

2. Any problems and how they were overcome

- Some of the video was filmed in landscape and some in portrait. I didn't realise this was a problem until I started editing all the video. To fix it I used Movavi Suite 20 and added in photos of my drawings, pictures and text down the sides.
- Remembering what to say was hard so we used some flash cards to help me.
- I used a greenscreen for my entry last year and wanted to have a go with it again but because it was filmed in my kitchen I didn't really have anywhere I could use it. Then I thought I could use it at the end and have a real geode behind me while I ate my candy geode.

3. Acknowledgement of any assistance.

Mum showed me how to edit my video on an app called InShot. I learnt how to insert new video, split the video and cut the video. I also learnt how to speed up small parts of my video. To finish it off my mum's friend helped me use Movavi Suite 20, I had to choose and insert pictures and text. This was also used for the picture on the greenscreen. I also did voiceovers.
