Software

My video was created with iMovie.
I used an iPad and its camera app for the filming.

Problems encountered

On the day of recording my neighbours were mowing their lawn and I had to complete my takes in between the noises. I was unable to film a bubble popping in slow motion as I had hoped to. I used an image from the internet instead. I had to do several takes as the wind blew the bubbles in the wrong direction sometimes.

Assistance

My Mum assisted me with the filming. We used an iPad and tripod to film. My sister, Alice blew most of the bubbles in the presentation. My Dad helped me do the research about bubbles and my Mum helped me write the script.
